HIB Lavatory

Self-contained container lavatories for sites, events and fleets. Three sizes, one spec.

2 · 3 · 6
water closets

8'
wide, ISO footprint

−40°
freeze-protected

230–350
gal tanks, or direct connect

Hot
water for handwashing

1
connection panel

Private, full-height, warm

Every unit is private rooms with a flushing toilet and a sink, not a trailer with partitions. Full-height doors, a sink in every room, heated and lit. Rated to −40 with heat-traced lines and insulated tanks, so it works in January in Fort McMurray and in August at a festival.

Built like a building

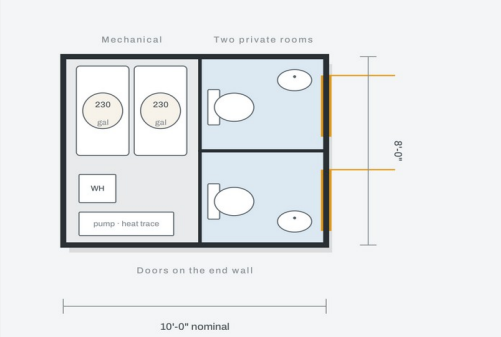

Vinyl-covered panel walls, heat-welded sheet vinyl floor coved up the wall, steel siding and fascias, membrane roof. Factory finish in HIB graphite with the amber door surround, so it looks right at a wedding and survives a laydown yard. Colour-matched repair panels stocked.

Fleet-ready

ISO 8' footprint, standard corner castings, forkliftable, one connection panel for power, water and pump-out. Direct connect or self-contained on tanks. Built in Nisku, Alberta on the same line that has delivered the programme to Canada's largest rental fleet.

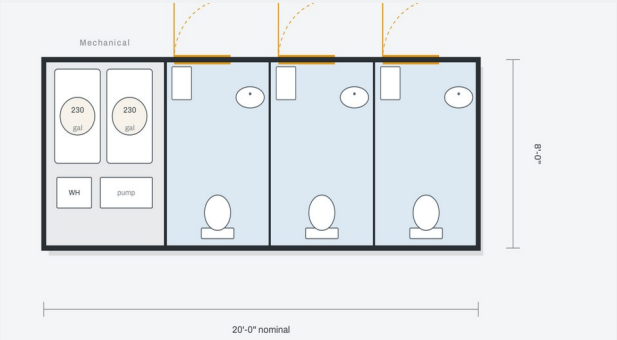

Three sizes

Lav 2 · 8 × 10

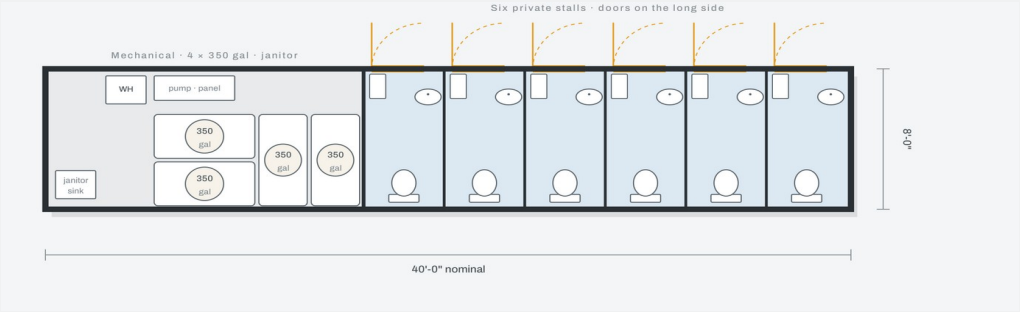

Lav 3 · 8 × 20

Lav 6 · 8 × 40

Two rooms · three stalls · six stalls. Same spec, same finish, same panel.

Specification

Shell	ISO container 8' wide, 8'6" high; 10', 20' or 40'. Corner castings, forkliftable, craneable
Rooms	Lav 2: two water closets, end doors. Lav 3: three, long-side doors. Lav 6: six, long-side doors, janitor sink
Each room	Flushing toilet, sink with hot water, mirror, dispensers, hook, LED light, exhaust. Full-height door with occupancy indicator. Accessible option
Walls and floor	Vinyl-covered panel walls; heat-welded sheet vinyl (corlon) floor over the container floor, coved 6" up the wall, floor drain per room
Water	Direct connect, or self-contained: 2 × 230 gal (Lav 2, 3), 4 × 350 gal (Lav 6). Heat-traced, insulated. Pump-out and fill at the panel
Heat and power	Thermostat-controlled forced-air electric heat, water heater, heat trace. Fully integrated electrical, single-point connection, 120/240 V. Generator-ready
Climate	Insulated and freeze-protected to −40 °C; ventilated for summer event use
Finish	HIB graphite corrugated steel, flat fascia top and bottom, amber door surrounds, canopy strip with downlights. Fleet livery optional
Options	Accessible room, urinals, exterior hand-wash station, solar and battery, fleet telemetry, custom livery. Showers: see HIB Wash
Lead time	[12] weeks from order. Fleet runs scheduled

[Price] per unit by size, fixed list · fleet tiers at 5 and 20 · purchase, lease or rental · 10-year structure warranty · quotes@hibstructures.com
